

**Water Quality Sampling  
Results Certificate**

<b>Client: Healing Waters Project</b>	Certificate Ref:	ALG-HW-0821
Lynford Water Public Lake	Report Date:	11/08/2021
	Analysis Start Date:	10/08/2021

**Algae Sampling**

Algae Species	Algae Type	Ave. no. of colonies or filaments/1ml
None detected	Blue Green	-

**Comments**

The sample was examined for the presence of Cyanobacteria at x400 magnification.

200ml of the sample was then filtered to concentrate the algal cells and then examined at x200 and x400 magnification.

**No cyanobacteria was found in the sample.**

The sample contained a good variety of colonial green and colonial golden algal species as well as a number of rotifer species.
